AlertWave

VNS2214 - Wireless PA Speaker

The VNS2214 Wireless PA Speaker is designed to play live-voice and pre-recorded messages wirelessly at indoor locations.
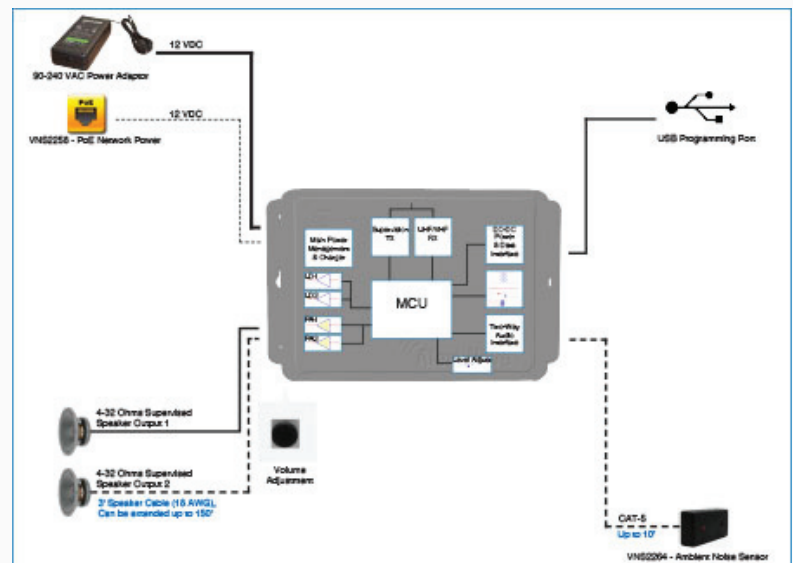

The VNS2214 simply requires power for installation, and has a PoE power option available as well. With the VNS2281 option, the VNS2214 is capable of playing audio through two connected speakers rather than one.

The **VNS2252** backup battery option allows the VNS2214 to continue working in the event of power loss. The **VNS2264** ambient noise sensor option gives the VNS2214 the unique ability to automatically adjust the level of its voice messages and alerts to match the noise of the surrounding environment.

For NFPA-72 compliance and easy maintenance, the VNS2214, with the **VNS2254** option, offers full wireless supervision from the main paging controller. This provides the system administrator with a detailed functionality status of each installed VNS2214 device (requires VNS5100).
