

VIDEOMANAGER EX CLOUD DEVICE SERVICE OFFERINGS

STANDARD

With VideoManager EX Cloud, you're entitled to the latest software and firmware updates, managed on your behalf - so you always have the most powerful solution available with the least maintenance. Provided on a monthly subscription basis per camera.

FEATURES

BODY-WORN CAMERA MANAGEMENT

Administer your suite of body-worn cameras from VideoManager EX. This includes assigning devices to ensure that all recorded footage can be traced back to a specific user, and upgrading devices to the most recent firmware.

Customise a wide range of recording behaviour including recording alerts, video resolution and GPS.

USER MANAGEMENT

Manage and streamline your workers' access to VideoManager EX using granular permissions, groups, and roles.

Meet your organization's security policies with comprehensive password policies, automatic account locking after incorrect password entries and two-factor authentication.

INCIDENTS

Group footage from body-worn cameras and other imported media into evidence bundles. Enables you to clip and redact videos in line with evidentiary requirements, and then share or export.

MEDIA IMPORT

Import external media in common formats - such as PDF, MP4, JPG, and PNG - into VideoManager EX. You can then process, redact, and handle them in the same manner as body-worn video.

MEDIA PREPARATIONS

Redact and annotate media without adding it to an incident. This includes blurring, pixelation, zooming, transcribing and cropping.

STREAMING

Stream live footage from your body-worn cameras back to VideoManager EX, over WiFi.

ONSTREAM

Use VideoManager EX to serve live-streams and recordings from your body-worn cameras back to an ONVIF-compatible Video Management System (VMS). This enables you to view - and record - footage in a third-party VMS.

REPORTS

Collate information about high-level system parameters - such as user behaviour, camera field trips and equipment availability - into one downloadable CSV file.

USER INTERFACE CUSTOMISATION

Integrate VideoManager EX into your organization's brand identity with a configurable colour scheme, logo and default language.

VB SMARTCONTROL APP

Watch and categorize VB400 footage securely while still in the field using the VB SmartControl Android or iOS app. Once your VB400 is redocked, all footage is automatically offloaded to VideoManager EX.

FEATURES

CENTRAL VIDEOMANAGER EX

Enables hierarchical architecture with oversight over multiple installations: one instance of VideoManager EX acts as a Central VideoManager EX (which controls licensing, configuration and metadata) while other instances connect to it as sites.

STREAMING SERVER EXPORT

Use your body-worn cameras to simultaneously stream footage to a cloud VideoManager EX instance and download footage to an on-premises VideoManager EX instance.

IDENTITY MANAGEMENT

Export a VideoManager EX user list with one click, then easily modify and re-import, or quickly migrate to another instance.

USER IMPORT TOOL

Automatically sync your existing user database with VideoManager EX to easily manage joiners and leavers and ensure up-to-date user permissions. Compatible with multiple sources, including Azure AD™.

COMPOSITE CLIPS

Compile multiple, parallel viewpoints of an event into one video within an incident, then watch the clips back simultaneously.

ANTIVIRUS INTEGRATION

Scan imported media for viruses in conjunction with a customer-provided OPSWAT™ service.

MEDIA PROPERTIES

Meet your organization's media categorisation requirements with VideoManager EX's powerful custom fields (including dropdowns, checkboxes, and date/time fields).

NOTIFICATIONS

Send emails or SMS messages to selected users when specific actions - such as a live stream starting or a new user logging in - occur on VideoManager EX.

SELF SERVICE

Enable users to create their own profiles on VideoManager EX via organizational email addresses.

TACTICAL VIDEOMANAGER

View the location of connected body-worn cameras in real time on a customer-provided Esri™ ArcGIS™ map.

STORAGE SERVICES

Storage for VideoManager EX Cloud is provided per gigabyte - so you can keep what you need, for as long as you need it.
